Gokulraj R

UI/UX Designer

With a Google UX Designer certification and a good proficiency in using design tools and software, I've curated a diverse portfolio that includes graphic design, UX writing, wireframing, front-end development, and, most importantly, UI/Visual design.

Notable Work

Roles: UI designer ,Ux researcher, Graphic designer.

Project Title: Pharmacy Mobile App

Description: Designed a user-friendly pharmacy app UI with seamless product ordering, online consultancy, healthy food recommendations, and order tracking features.

Project Title: Musiverse app and website

Description: Designed a seamless music experience with library, playlist, trending songs, recently played, and personalized song recommendation features across both app and website platforms.

Project Title: Responsive Website

Description: Designed a responsive online course website, ensuring optimal user experience across mobile, tablet, and desktop platforms

Project Title: Sparks-3D Cool drinks Website

Description: Designed a 3D website showcasing a variety of cool drinks with different fruit flavors, including nutritional facts with aesthetic visual design.

Modeled cool drinks tins in Blender 3D and created product labeling in Photoshop for a captivating user experience.
